Al 04 de noviembre del 2021 se registró un total acumulado de 132,119 niñas, niños y adolescentes contagiados y 1,134 fallecidos.

El aumento de casos nuevos llegó a 2.4 % sobre una base numérica que es la quinta parte de la que alcanzamos en octubre de 2020: mientras el año pasado tuvimos periodos en los que superamos los cuatro mil contagiados por semana en octubre se ha registrado entre 470 y 744 contagiados por semana.

NNA CONTAGIADOS, ni alarmismo, ni triunfalismo, realismo basado en evidencias

A nivel nacional se presenta un aumento de los casos nuevos en 2.4%. Este es un promedio regional que presenta disparidades, el número total de NNA contagiados reportados en este boletín representa la QUINTA parte que el registrado en agosto y setiembre de 2020. Se puede observar que el contagio (nuestro corte es semanal) llegó a 4265 en la semana del 22-28 de agosto 2020. El número mayor de contagios entre el 8 de octubre y el 04 de noviembre es de 744.

Para tomar conciencia de la magnitud de incremento no basta guiarse del porcentaje, resulta clave analizar también el número de contagiados de la semana anterior Adjuntamos el cuadro desglosando los contagios por grupos de edad desde la tercera semana de junio. Se observa claramente que respecto a la semana del 17-25 de junio el número de contagios se ha reducido a la tercera parte en la semana entre el 29 octubre – 04 de noviembre.

Contagios 2020
9/8 – 18/9 2020

| 09/08 | 15/08 | 22/08 | 29/08 | 05/09 | 12/09 |
|--------|-------|-------|--------|--------|-------|
| 14/08 | 21/08 | 28/08 | 04/09 | 11/09 | 18/09 |
| 3,076 | 4,074 | 4,265 | 3,602 | 3,090 | 3,449 |
| -13.0% | 32.4% | 4.7% | -15.5% | -14.2% | 11.6% |

Contagios 2021
8/10 al 4/11

| 08/10 | 15/10 | 22/10 | 29/10 |
|--------|-------|-------|-------|
| 14/10 | 21/10 | 28/10 | 04/11 |
| 470 | 744 | 673 | 689 |
| -26.1% | 58.3% | -9.5% | 2.4% |

Seamos claros, estamos ante una situación favorable que se reforzará con la vacunación de los adolescentes y niños en los próximos meses, una coyuntura propicia para el retorno escolar

RETORNO A LA PRESENCIALIDAD Y SEMIPRESENCIALIDAD

La data que genera el MINSa y que también conoce el Ministerio de Educación permite conocer a detalle la evolución regional, provincial y distrital de las y los contagiados y fallecidos, de allí factibilidad de hacer un diseño seguro, focalizado y contextualizado del retorno a la presencialidad.

Mayor mortalidad de niños cero a cinco años a lo largo de la pandemia

Por otro lado, llamamos su atención sobre la mayor letalidad del COVID 19 en los NNA de 0 a 5 años que representa 47% (529 NNA), de los 1131 fallecidos. Sin embargo, no existen vacunas para los niños de cero a cuatro. Solo se vacunará a NNA de 5 a 17 años.

Queda como un desafío tomar o fortalecer las medidas de prevención y protección de los niños de 0 a 4 años. En caso de contagiarse su salud y su vida depende básicamente de la detección temprana que hagan sus familias y de las medidas que tome el Ministerio de Salud para prevenir el desarrollo de formas graves de COVID19, así como para garantizar la calidad de la atención.

CONTAGIOS, campañas focalizadas

En este contexto se espera medidas especiales de bioseguridad en las regiones que representan mayor contagio: Lima, Piura, Junín, Loreto e Ica que concentran el 55 % del total de contagiados: Lima (48,776), le siguen a distancia Piura (6,689), Junín (6,039), Loreto (5,519) e Ica (5,526).

De los 132,119 NNA contagiados, el mayor porcentaje corresponde a los adolescentes de 12 a 17 años (52%), siguiendo los de 6 a 11 años con 26%. y, luego los de 0 a 5 años con 22%.

Lima requiere especial atención porque representa 38% del total. Los cinco distritos de Lima Metropolitana y Callao con más contagiados son: Lima Cercado (4,178), San Juan de Lurigancho (3,335), Jesús María (2,619), San Martín de Porres (2,302), y Ate (2,130).

11%, mientras que los de 6 a 11 años y los de 0 a 5 años disminuyeron en -4% y -14% respectivamente.

El aumento se ha dado en 8 regiones, en un rango de 9% a 78%. En cambio, en 16 regiones se observó una disminución, con porcentajes de variación de entre -3% y -100%. En 1 región se mantuvo constante.

Las 6 regiones de mayor incremento de casos nuevos son Tacna 78%, Tumbes 78%, Cajamarca 75%, Piura 31%, Lima 18% y Cusco 15%.

FALLECIDOS

El total de niñas, niños y adolescentes fallecidos al 04 de noviembre del 2021 es de 1,134. De ellos, 529 de ellos tenía de cinco años a menos (47%).

El 28% de los fallecidos se concentra en la región Lima, Piura 8% (87 NNA), le siguen Ucayali (78 NNA), Lambayeque (70) y Loreto (60). Juntos concentran el 54% del total de fallecidos.

En este periodo, del 29 de octubre al 04 de noviembre del 2021 ha fallecido un (1) NNA.

DESAFÍO FRENTE A LA TERCERA OLA

Servicios de salud

Garantizar camas UCI pediátricas con equipo de respiración especializado para niñ@s de cinco años a menos, así como actualizar la capacidad de atención hospitalaria en relación con la demanda previsible. Realizar estudios a partir de las historias clínicas de l@s NNA fallecidos para identificar los elementos que estarían detrás de 1131 decesos con énfasis en los de los NNA de cero a cinco años.

Informar a los padres de niñ@s que se contagien de COVID 19 de las posibilidades existentes de desarrollar formas graves e informarlos sobre los signos de alerta.

Capacitar al personal de salud y actualizar los protocolos.

Prevención de contagio

- Realizar campañas de prevención del COVID 19 dirigidas a adolescentes en los distritos de mayor carga viral.

Por un retorno seguro, focalizado y contextualizado a la semipresencialidad y presencialidad en la educación

Las niñas y los niños no son invencibles frente al Covid 19

RESUMEN RADAR COVID-19 AL 28 DE OCTUBRE DEL 2021
